We consistently strive to meet our community's needs in Diagnostic Imaging at Heart of Lancaster. We listen to every patient, physician, and visitor who passes through our doors. We thank you for your on-going feedback and great ideas. In response, we have added additional imaging resources to our top-notch facility. Please review the latest state of the art services we provide to our physicians, community, friends, and family. If you have any questions pertaining to your Diagnostic Imaging order or scheduled procedure, please call (717) 625-5529

**Radiology and Special Services:** We offer a full array of radiology procedures to include Routine x-ray; Scoliosis and Leg length; Upper and Lower Gastrointestinal studies (UGI, Barium Enema/ACBE/BE, Small bowel follow-through/SBFT); digitally recorded Swallowing/Esophagus studies; Intravenous Pyelogram studies (IVP's), Full service Interventional Radiography, and PICC line insertions.

**MRI (Magnetic Resonance Imaging):** We offer full service MRI and MRA (magnetic resonance angiography) scans to include accommodations for claustrophobic, vented, and medication infused patients. Call to schedule your MRI scan today and talk with our experts to answer any questions you may have regarding special accommodations or concerns.

**CT (CAT Scan):** We offer superior quality at ultra-fast scanning speed for bone, organ (brain, lungs etc.), arteries, critical care, biopsy, and other anatomical imaging of the body. When time and quality matter, you want your CT scheduled at “Heart” on the new Philips Brilliance 64 slice CT scanner. Our new scanning table can accommodate body weight up to 650 pounds. For same day and next day appointments on the fastest CT scanner in town call our One Call Scheduling department: **(717) 625-5555**.

**Ultrasound:** We offer routine and special procedure ultrasound services to include but are not limited to the gallbladder, liver, ovaries, bladder, thyroid, scrotum, blood vessels to include the aorta and its major branches, kidneys, pregnancy (fetus), uterus, guidance for special procedures and needle biopsy, prostate, and Doppler ultrasound (for blood flow imaging). We offer evening appointments!

**Mammography:** Our friendly professional breast care services include routine screening, diagnostic, special view(s) to include implants, needle localizations, stereotactic and ultrasound guided breast biopsy. We offer routine screenings after hours, please contact our One Call scheduling department and tell us your scheduling needs.

**DEXA:** Our Radiologists and Technologists are certified with The International Society for Clinical Densitometry (ISCD). Our certified bone density technologists are ready to provide your quality bone density scans. We can accommodate special needs!

**Nuclear Medicine:** We offer full service nuclear scanning to include but are not limited to, Bone, Nuclear Stress Tests, Gallbladder function, Lung/VQ, Thyroid, Kidney, Liver, Testicular, Lymph system/nodes, Vascular flow, Gastrointestinal (GI), SPECT imaging, Octreoscans, and more. We have appointment availability morning and afternoon tell us what works best for you!

**One Call Scheduling:** We have in house schedulers ready to assist patients and ordering providers with scheduling, ordering, and procedure preparation needs. You will find this service to be fast and efficient. Please call to schedule an appointment that meets your scheduling needs. If you choose to leave a message tell us your name and number and we will return your call promptly.

**One number, one call: (717) 625-5555**

**Accreditation:** Our Imaging department is “Accredited” through the American College of Radiology (ACR) and The Intersocietal Commission for the Accreditation of Nuclear Medicine Laboratories (ICANL). Please call to schedule your Diagnostic Imaging study at our “Center of Excellence” we have certified technologists ready to assist you: **One Call Scheduling (717) 625-5555**

**PACS (Picture Archiving and Communication System):** Digital images are stored on a secure healthcare network. Through special privileging, user ID, and password protected access, your healthcare provider may review your diagnostic images and reports to give you timely routine or stat results. This advanced technology allows fast 24/7 reporting coverage from Board Certified Radiologists.
